

Science Communication Alongside Your PhD

This training is for anyone currently in a PhD programme who wants to learn how to make science communication a part of their PhD journey too.

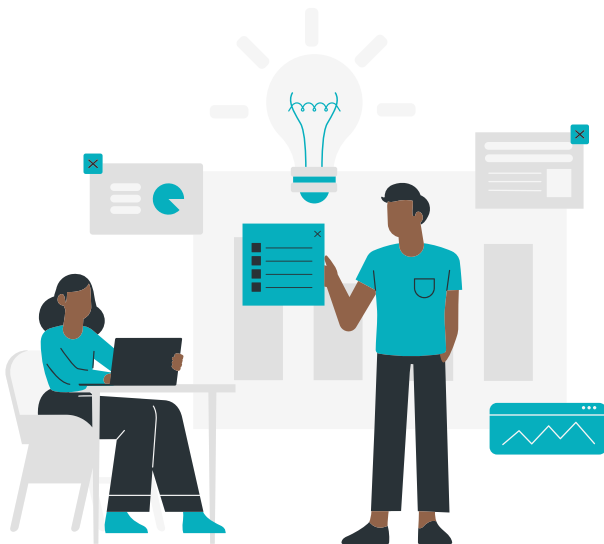

Science communication can be extremely rewarding, with chances to learn new skills, meet new people and gain confidence outside the world of research.

It can also be used to help inform your own research, help you plan for future research direction and opportunities!

This training will cover:

- How to communicate your research
- What types of communication work best for you
- How to manage your already tight time alongside science communication
- How to get science communication opportunities
- How science communication can be tied into research/thesis

Example Half Day Workshop

9:00-11:00

- Introduction to science communication
- Types of science communication
- How to fit science communication in alongside PhD
- Time management and planning skills

11:00 - 11:15

Break

11:15-11:45

- Reflection exercise to determine - what skills does each participant want to learn and what opportunities may then best be best to seek out.

11:45-12:30

- Fitting science communication into a thesis
- Questions
